

Worcester Collage Learning

Worcester - Bosch has always had an enviable history of well made and reliable boilers together with excellent training and customer service.

In 1996 the College-Linked Learning was launched, support was given to Colleges across the UK now in 2007 there are 129 centres from Aberdeen to Poole,

but only a couple are independents and Mr Combi Training School joined in summer of 2007 in recognition for the high standard of training given.

Each student enrolling is given a 'Welcome Pack' Worcester bag with technical information, CD, DVD 'freebies' and discount vouchers for factory training.

Award Winners 2007

Helping to set standards that make everyone a winner

In 1996 Worcester, Bosch Group, introduced the **Worcester College-links Programme** – an important nationwide training initiative for students aiming for a career as heating industry professionals.

Today, the continuing success of this initiative is clear to see: 129 colleges and training centres now benefit from the programme, and 15th August 2007 marked the second annual Worcester College-linked Learning Awards, presented at the company's headquarters in Worcester.

"All the nominees and winners should be immensely proud to be part of these awards. And it's wonderful to be in a position here at Worcester to be able to reward those who are making a real difference to setting the standards and contributing so much to the successful future of the heating industry."

Awards host
Martyn Bridges,
Director of Marketing
and Technical Support

'I'd just like to say...'

"It gives me great pleasure to know that Worcester's ongoing and long-term commitment to providing literature, equipment and advice in support of the College-linked Learning Programme is reaping such excellent rewards throughout colleges and training centres right across the country."

Richard Soper,
Managing Director

"Students are the future of the heating industry and the student welcome pack we've developed for them is intended as a bit of extra help and incentive as they prepare to embark on their first jobs as newly-qualified installers. It's a time they're most likely to need advice and reassurance regarding best practice and satisfying customer requirements as true professionals."

Phil Bunce,
Training Manager
